Part III DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-28, drawn to a kit for creating a dental implant, an implant body and a press fit abutment, classified in Class 433, subclass 173.

Group II. Claims 29,30, drawn to a screw threaded abutment, classified in Class 433, subclass 172.

Group III. Claims 31-33, drawn to method of forming a dental implant, classified in Class 433, subclass 173.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. (M.P.E.P. § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require the screw threaded abutment to have

a non-threaded section, as required by claim 29. The subcombination has separate utility such as a screw thread abutment used with any screw threaded implant.

3. Inventions III and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (M.P.E.P. § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process, such as prosthesis retention or the like, not requiring the particulars of the process as claimed.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

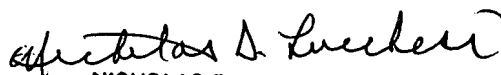

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
